
A Call for Standardized Naming and Reporting of Human ESC and iPSC Lines.

Journal: Cell Stem Cell

Publication Year: 2011

Authors: Mai X Luong, Jonathan Auerbach, Jeremy M Crook, Laurence Daheron, Derek Hei, Geoffrey Lomax, Jeanne F Loring, Tenneille Ludwig, Thorsten M Schlaeger, Kelly P Smith, Glyn Stacey, Ren-He Xu, Fanyi Zeng

PubMed link: 21474098

Funding Grants: The Stem Cell Matrix: a map of the molecular pathways that define pluripotent cells, Ensuring the safety of cell therapy: a quality control pipeline for cell purification and validation

Public Summary:

Human embryonic and induced pluripotent stem cell lines are being generated at a rapid pace and now number in the thousands. We propose a standard nomenclature and suggest the use of a centralized database for all cell line names and a minimum set of information for reporting new derivations.

Scientific Abstract:

Human embryonic and induced pluripotent stem cell lines are being generated at a rapid pace and now number in the thousands. We propose a standard nomenclature and suggest the use of a centralized database for all cell line names and a minimum set of information for reporting new derivations.
